BRI-NYLON KNITTING

4-Ply

100% BRI-NYLON MOTHPROOF

● **BRI-NYLON YARN** is something quite new in knitting. Nylon is a man-made fibre with its own special properties — it will not shrink or felt and colours in **BRI-NYLON** have a unique brilliance. Bright colours are brighter and white is whiter in **BRI-NYLON**. Moths just will not touch **BRI-NYLON**.

BRI-NYLON is a man-made fibre; it is different from wool and because of this it is even more important that **BRI-NYLON** be knitted strictly to the correct tension. Loose knitting will stretch, especially if not washed correctly, so do make sure that your tension is correct. To be sure of complete satisfaction, knit a small square and check your tension before commencing your garment.

Because **BRI-NYLON** does not have the same amount of elasticity as wool, it cannot always be substituted for wool. Some stitches pull-in tighter in wool and if these patterns are used for **BRI-NYLON**, you will find that they do not pull-in to the same extent and your garment will be much too big. Ribbed-effect stitches and cables in particular need special designing.

HOW TO WASH PATONS BRI-NYLON KNITTING, 4-PLY

Wash frequently as you would your woollies — use plenty of warm suds and rinse thoroughly. Remove excess moisture in a towel or spin dryer, and dry flat. Use your fingers to press any ribbing together

so that it dries back to its original shape. Never hang a **BRI-NYLON** garment up to dry and if pressing is needed be sure to use a cool iron.

● *Never substitute BRI-NYLON for the yarn recommended unless the instruction clearly states that this may be done for that particular design.*

To avoid disappointment you must use the yarn recommended for each design.

It is also most important that you purchase sufficient yarn of the same dye-lot to complete the garment, since it is not possible to avoid a slight variation in dyeing each dye-lot.

Tension

HOW TO CHECK YOUR TENSION—

Before you commence knitting, check your tension carefully—on this depends the success of the finished article. Take the wool and needles specified in the instructions, cast on 20 stitches, work 20 rows in plain smooth fabric. **Lightly** press work. Check the tension by placing an inch tape across the stitches, count the exact number of stitches to one inch and compare with the tension given in the instructions. All tensions are measured over plain smooth fabric, lightly pressed. If your tension is too loose, try a size finer needle. If your tension is too tight, try a size coarser needle. If there is more than one size of needle recommended in the recipe and you alter the needles to obtain the correct tension in plain smooth fabric, corresponding alterations must be made to the needles throughout the instructions.
